# Juan Fernando Pertuz Pabón

## Full Stack Developer

### ABOUT ME

Passionate developer with a keen eye for detail and a love for creating seamless user experiences. Specialized in Vue.js, Node.js, and modern web technologies. Currently pursuing a degree in Software Engineering with a strong focus on AI and intelligent systems. 9 months of experience developing high-level websites including frontend and backend development.

### EXPERIENCE

- 9 months developing modern websites with technologies like Vue.js, React, Express.js, and TypeScript.
- I developed my personal portfolio with React, which you can find at [<https://juanfernando447.github.io/AI-PORTFOLIO/>].
- I managed a support project, resolving bugs and deploying to GCP.
- I participated in the development of a backend using the Strapi Headless CMS.
- Currently developing a portfolio platform for financial clients, using React and Nest.js.
- Currently developing a Dominican finance platform for clients in the Dominican Republic. Technologies: Vue.js and Express.js

### TECHNICAL SKILLS

#### Frontend Stack:

- HTML5, CSS3 & JavaScript
- Vue.js & TypeScript
- Tailwind CSS, Bootstrap
- Sass
- Vite

#### Backend & Tools:

- Node.js & Express

- Python
- Git & GitHub
- Package Managers (NPM, YARN)

#### Additional Skills:

- PostgreSQL & Firebase
- Postman (API Testing)
- React

### SOFT SKILLS

- Teamwork
- Problem Solving
- Basic Office Software Knowledge
- Google Workspace (Docs, Slides)
- Organization and Time Management
